Hi, welcome to our NETS150 Project: Night in New York! We recommend using Eclipse to set up our project, but any IDE should work!

1. We recommend using JavaSE-1.8 for this project!
   a. Once you import the files, please right click on the .jar file and Build Path
   b. Then you should be all set up

4

2. Then right click on GraphicMain.java and click Run As → Java Application

3. This should appear!

4. Choose the categories you like the most in the order you prefer the most!
    a. For example, if you like Mexican first and Italian second, press the buttons in that order!
5. Follow the instructions and then submit!
